INVENTORY MANAGEMENT SYSTEM FOR RETAILERS

EMPATHY MAP

SAYS

Inventory goods have to be in the right place at the right time with the right products. The delivery should not be slow. It should give regular data.

THINKS

It should recognize each stock thing and its related data. It should be accurate and efficient than manual process. It should reduce human errors. It reduces the labor cost.

USER

DOES

To give pre-details for inventory system when to order, how much to order and where to store stock. To give easy-to-read locations, company-wide policies and processes.

FEELS

The inventories should arrive without and damage. There should be enough stock to fulfill orders. There should have backorders. It would enhance productivity.
